DREPANIDAE (/65-drepanidae.html)

Subfamily: DREPANINAE (5G 7S)

Falcaria

001 *Falcaria lacertinaria* (Scalloped Hook-tip)

(/001-falcaria-lacertinaria-scalloped-hook-tip.html)

Drepana (2S)

004 *Drepana curvatula* (Dusky Hook-tip)

fw: 16-21mm; migrant with <100 British records; mainly August, some May; S & SE coasts of England

Cilix

007 *Cilix glaucata* (Chinese Character)

(/007-cilix-glaucata-chinese-character.html)

Watsonalla (2S)

002 *Watsonalla binaria* (Oak Hook-tip)

(/002-watsonalla-binaria-oak-hook-tip.html)

005 *Drepana falcata* (Pebble Hook-tip)

(/005-drepana-falcata-ripple-hook-tip.html)

003 *Watsonalla cultraria* (Barred Hook-tip)

fw: 12-17mm; bivoltine May-Jun, Jul-Sep; beech (*Fagus sylvatica*); local in beech woods on calcareous soils mainly in S.England, but occurs north to S.Scotland.

Sabra

006 *Sabra harpagula* (Scarce Hook-tip)

fw: 17-20mm; Jun-Jul; small-leaved lime (*Tilia cordata*); RDB restricted to woodland with much small-leaved lime in the Wye valley.
